e the People, exercising our inalienable rights to life, liberty & the pursuit of happiness, hereby petition our neighbors & our governments to cease making cluster
bombs, uranium munitions & other weapons which gravely harm, blind, burn & kill people
for many, many years following their manufacture & use. We hereby honor the human
needs of all people for life liberty, & the pursuit of happiness. We seek & find opportunities
today to make some sacrifice to honor those needs, including the need for keeping hands &
feet, life & limb! We recognize that these needs far outweigh our felt need for excess material
comforts & social standing based on military might. We engage today through word & deed
in an experiment in truth, love & compassion, inviting your talents, your care, concerns &
creativity to freely & kindly welcome & address the opportunities before us today, & until
our dying days.
